

Unit 2 Activity 1: Who is John Doe?

Checklist worksheet. Write answers in your exercise book.

Name: _____ Class: _____ Date: _____

Step 1: Open the dossier

- ☐ Open: <https://sgs-science.web.app/ks3/year7/unit2/john-doe.html>
- ☐ Scan all 15 evidence images.
- ☐ For each image ask: *What does this reveal?*

Step 2: Set up your investigation table (in your book)

Draw a table with these headings (one row per image):

- ☐ Image #
- ☐ What does it reveal?
- ☐ Public or private? Why?

Step 3: Find 10+ clues

Your list must include:

- ☐ John's name
- ☐ John's date of birth (day + month)
- ☐ The city John lives in

Then add any other clues you can work out (hobbies, places, routine, family info, etc.).

Step 4: Decide public vs private

For each clue, explain whether it should be public or private:

- ☐ Could it help someone identify or locate John?
- ☐ Could it harm his safety or reputation?
- ☐ Is it *nice to share* or *risky to share*?

Step 5: Reflection (answer in your book)

- A. What picture can you build of John? (4-5 bullet points)
- B. Choose 3 things that should have stayed private. For each: one sentence explaining the risk.

Step 6: Partner discussion

Share one surprising clue you found. Compare what you thought should stay private.

Learning check

- ☐ I can explain the difference between public and private information online.
- ☐ I can explain how small clues build a picture of someone.
- ☐ I can explain why sharing too much can be risky.
